This advisory is to inform you that initial site preparation work will begin on Escondido Village from mid to late January. Activities expected on site include:

- PG&E gas disconnects are scheduled to start as early as January 11 to January 31
- Ongoing tree removal and relocation
- Fencing installation around vacant buildings will begin mid January (see map below)

Temporary parking closures may be required due to the activities listed above.

Please check the project webpage for more information: http://newgradhousing.stanford.edu/index.

Construction notices will be provided in advance of all project related activities on site.
