Dear East Campus Commuter,

Construction on the Escondido Village Graduate Residences project will continue to create impacts for ‘C’-permit parking.

On Tuesday, June 27, 2017, Jenkins Court, McFarland Court, and Hoskins Court parking lots in Escondido Village will close permanently to facilitate continued construction. This is expected to reduce parking availability for those who normally park in shared ‘ES/C’ permit spaces in these areas. The closures will also increase parking demand throughout the northeast part of campus.

East Campus commuters should expect parking to become tighter and, at times, to be further from their worksites. Areas of ‘C’-permit parking will remain available on the east side of campus, including the Knight Management Center garage and the Varsity and Maples parking lots.

Please find a map of ‘C’-permit parking options on East Campus on our “Maps of the EVGR Project” web page.

Employees are encouraged to consider sustainable transportation options to reduce the need to park on campus. For assistance with sustainable alternatives, please contact us at commuteclub@stanford.edu.

The Escondido Village Graduate Residences project will increase graduate housing on campus with 2,400 new beds, enabling the university to provide affordable housing to future graduate students and their families. Two parking garages will also be constructed as part of the project. Parking and traffic impacts are expected throughout the construction process, which is scheduled to be completed in 2020.

For more information on the EVGR project, please visit our “Escondido Village Parking During Construction” web page, or contact us directly at parkingoperations@stanford.edu.

Sincerely,

Parking & Transportation Services
