Subject: SRWC Barron Garage Safety Message

Dear SRWC Commuters,

On behalf of [SRWC Operations](#), we are sending you this message to address concerns they have received regarding visibility issues for motorists using the Barron Parking Garage.

SRWC motorists have expressed concern about trees obstructing their view when entering or exiting the garage. SRWC Operations promptly took the following actions to address these concerns:

- To address immediate safety concerns, SRWC Operations removed two (2) trees, one (1) on each side of the Bay Road driveway at the Barron Parking Garage. ([Barron Parking Garage entrances/exits map](#).)
- They are unable to address concerns at this time about the trees that are on Bay Road itself, because these trees reside in the public right-of-way and belong to the city. Any action involving these trees will require approval from Redwood City Engineering and Planning.
- The Real Estate project team has engaged Stanford's landscape architect and civil engineering partners for solutions.
- SRWC Operations reached out to our office (Parking & Transportation Services) to ask that we inform you (those who are currently on the SRWC campus or will be moving there soon) regarding the steps they are taking and recommendations for your safety.

In addition, please observe these points as a motorist:

- There are two entrances and exits for the Barron Garage: one on Bay Road and one on Barron Avenue.
- **Do not turn left from Bay Road to enter the garage.** If you are approaching the garage from the west on Bay Road, **please turn left on Barron Avenue** and use the Barron entrance.
- When exiting the garage, if you need to turn left (east), please exit on Barron Avenue. For your safety and the safety of others, left turns should not be made from the Bay Road exit. For more information, please refer to our [parking entrances and exits map](#).
- Please proceed slowly and attentively when entering, exiting, and traveling within the Barron Parking Garage and surrounding areas.

Safety is a top priority. Please [contact SRWC Operations](#) if you have questions or concerns.

Thank you for all you are doing to make the transition to SRWC safe and successful.

Best regards,

Parking & Transportation Services
